

# Oil Quantity Sensor

Works in flight & on the ground

0.9" X 0.8"

Display on our AG6  
or your EFIS

# Oil Quantity Sensor

Works in flight & on the ground

0.9" X 0.8"

Display on our AG6  
or your EFIS

Replace your oil drain plug or spare oil plug with this Oil Quantity Sensor.

Fully user programmable

Features outputs to your EFIS, to our model AG6 or other displays.

Ability to linearize the oil quantity output as you add each quart

Analog Outputs:

Oil quantity (0 to 5V)

Optional - Oil Sensor Temperature (0 to 5V)

Digital Alarm Outputs (open collector type):

Caution oil level

Warning oil level

Oil over temperature

Oil quantity output out of calibration

Sensor utilizes safety wire holes

Sensor types available: Continental, Lycoming, UL Power and more requested

More details and specifications at: [www.aircraftextras.com](http://www.aircraftextras.com)
