

FOR SALE

Just about everything you will need to build and then maintain an RV or similar metal airplane. I built an RV-6A with these tools but am quitting flying, so all tools must go. Buy the whole package for \$2,000 (a small fraction of new cost) and you are in business. All the aircraft tools were bought new from Vans, Avery, Cleaveland and/or Aircraft Spruce. The package will not be parted out. I want this to go to someone who is starting their dream but must watch their budget. I suggest someone within a day's driving distance of Columbus OH would be a good candidate to avoid shipping heavy items.
